

Table 2. Levels of dioxins in pigs from the incident farm and from the Danish monitoring program. All samples are of Danish origin.

Origin of sample	Year	Sample	pg WHO-PCDD/F-TEQ per gram of fat
Incident farm	2015	The contaminated sow	4.0
		The 8 sows (min and max)	0.3 – 0.9
		The 16 finishing pigs (min and max)	0.1 – 0.4
	2013	One sow	0.55
	2016	One sow	0.22
Random sampling	2015	Danish sows (n=16)	0.1 – 0.4
Random sampling	2015	Danish pigs (n=54)	0.04 – 0.4
EU maximum level for pigs (2)			1.0

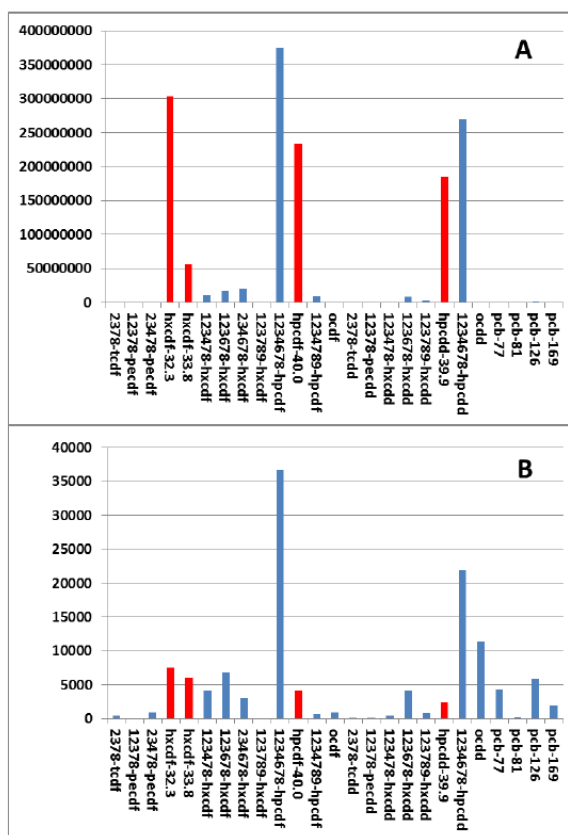

Figure 3. Comparison between the congener profiles found in the camouflage net (A) and in fat from the sow (B). See Figure 2 for further explanations concerning colors and names.
